INVESTOR CONCEPT BRIEFING / V0.1

HAVEN

DESIGNED TO STAY.

Modern automotive design. Modular ownership.
A radically different relationship with your car.

Concept-stage proposal only. No vehicles manufactured, investment secured, supplier contracts or production approval.

A CAR SHOULD IMPROVE WITH AGE.

Most consumer technology is upgradeable. Vehicles too often demand total replacement.

THE USER PROBLEM

Long repair cycles, costly proprietary components and inflexible feature bundles.

THE HAVEN RESPONSE

A compelling standard vehicle that supports validated component reuse and modular upgrades.

THE OPPORTUNITY

Combine automotive design aspiration with a more owner-friendly value proposition.

Founding thesis. Consumer interviews and independent market validation are pending.

ONE PHILOSOPHY. TWO VEHICLES.

P1 / CORE

$17,990 delivered target / everyday sports sedan

P1R / FOUNDER'S

$129,990 target / limited halo GT

Pricing and volume goals are not validated. Models may require unrelated structural platforms.

A REAL CAR.
A NEW OWNERSHIP PHILOSOPHY.

- Four doors; daily practicality
- Built-in camera and offline voice targets
- Open parts / documented repair concept

Proposed gasoline-first architecture. Donor platform and physical dimensions not selected.

THE HALO THAT MAKES A STATEMENT.

- Distinctive, low-volume grand tourer
- Luxury materials and custom commissions
- Performance architecture: EV vs ICE under study

No validated horsepower, acceleration, range or production cost; donor selection pending.

KEEP THE CORE. UPGRADE THE EXPERIENCE.

01 BODY

Nonstructural fascia / wraps / trims

02 COMPUTE

Isolated cockpit processing / screens

03 CABIN

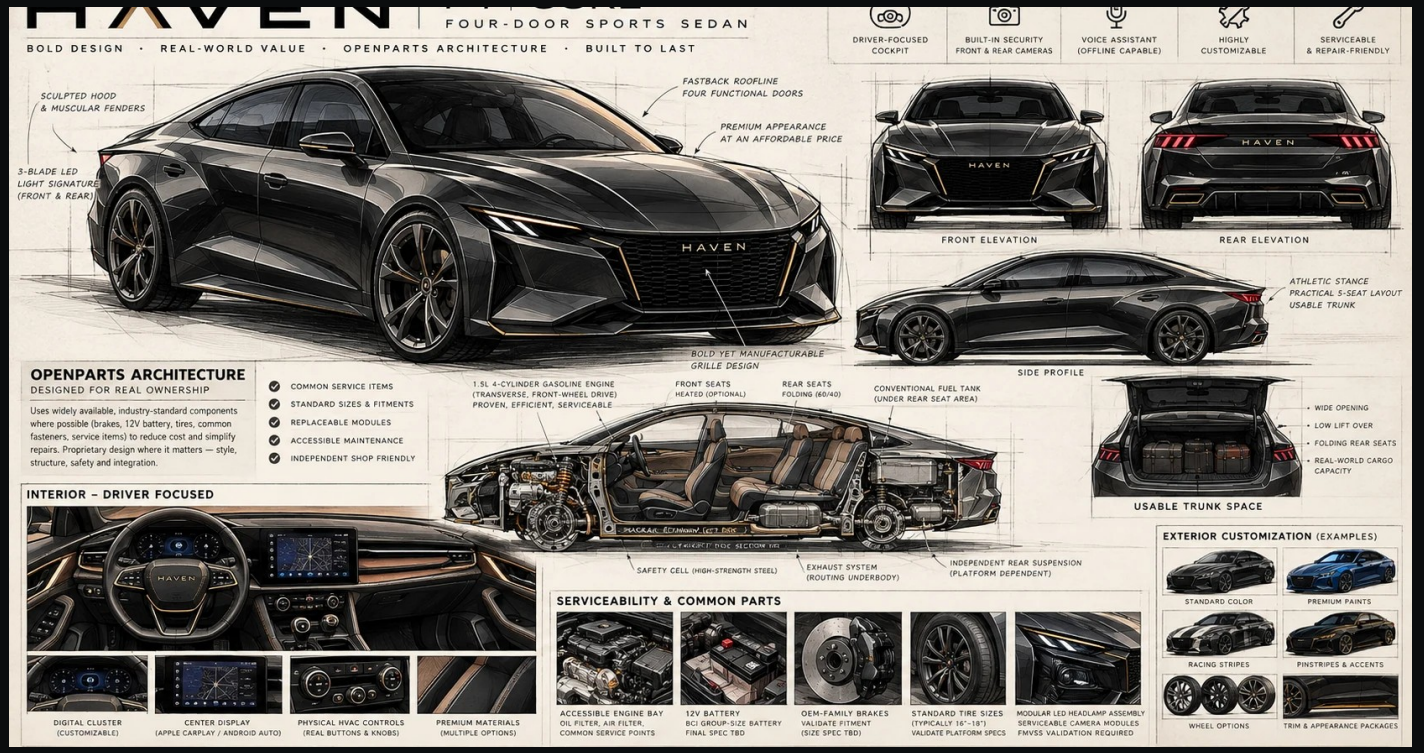

Upholstery / accessories / audio

04 SERVICE

Verified common parts / fitment

Safety-critical structure, brakes, emissions, steering and restraints require controlled validation and approvals.

A VEHICLE THAT CHANGES WITH ITS OWNER.

AT PURCHASE

Colors, trim, seating materials and appearance packages.

OVER TIME

Audio, compute upgrades, approved wheels and removable accessory panels.

LONG-TERM

Public repair info, replacement parts registry and independent-shop compatibility.

Illustrative programs; interface and installation validation required.

REVENUE THAT RESPECTS OWNERSHIP.

VEHICLE MARGIN

Direct or compliant low-overhead sales and distribution partners.

MODULAR UPGRADES

Genuine accessories, validated third-party parts and optional features.

PLATFORM ECOSYSTEM

Partner-supported parts registry, servicing and licensed accessory programs.

No subscription lockout for installed essential functions.

Hypotheses only: no orders, customers, active sales network or manufacturer agreements.

PRICE DISCIPLINE. NOT WISHFUL MARGINS.

P1 CORE

Target price

$17,990

Illustrative cost

$15,100

MODELLED VEHICLE MARGIN

16.1%

P1R

Target price

$129,990

Illustrative cost

$125,000

MODELLED VEHICLE MARGIN

3.8%

Unquoted scenario assumptions; P1 below 20% goal and P1R well below a sustainable halo target. Validation and redesign are required.

EARN THE RIGHT TO SPEND.

00

CONCEPT

Brand studies / founder charter / discovery

01

BENCH

Voice + dual camera tech prototype

02

MULE

Drivable donor-based P1 demonstrator

03

VALIDATE

Engineering, homologation and scale

Timing and investment gates are funding-, partner-, and validation-dependent.

BUILD PROOF. NOT BURN RATE.

FOUNDER PHASE 0

$2,500–$10,000

Existing 90-day safe personal budget range; spend in stages, not all at once.

FIRST PROOF

Independent interviews, name clearance, cost model and supplier dialogues.

PROTOTYPE CAPITAL

External partner funding or sponsorship before donor purchase.

FACTORY FINANCING

Separate multi-million-dollar engineering and industrialization program.

No fundraising is currently offered by this document. Not an investment solicitation.

WHAT MUST BE PROVEN.

UNIT ECONOMICS	Achieving pricing targets with positive durable margins
PLATFORM ACCESS	Licensing an existing compliant automotive architecture
REGULATORY	Safety, emissions, software, sales law and recall responsibilities
NAME & RIGHTS	Trademark clearance and design/IP diligence
TEAM & CAPITAL	Qualified engineering leadership and financing

LET'S BUILD THE RIGHT FOUNDATION.

Seeking manufacturing introductions, technical advisors, costed feasibility proposals and aligned early-stage strategic conversations.

Concept-stage discussion only. Company structure, brand clearance and specific financing terms require further work.

WHAT IS KNOWN. WHAT IS HYPOTHESIZED.

- Visual references: SpaceX.com; LucidMotors.com; Slate.auto/en. Design inspiration only.
- Current HAVEN visuals: internal AI-generated concept sketches and renders, not production vehicles.
- Cost model: HAVEN Platform & Supplier Cost Model 2026 — hypothetical supplier-level allowances, no bids.
- P1 / P1R targets: $17,990 and $129,990 aspirational delivered prices; feasibility unproven.
- OpenArchitecture: candidate nonstructural modular systems; safety-sensitive interfaces require validation.
- No active supplier contract, financing round, regulatory certification, customer order book or launch date.
